

WINEMAKING - Method of Production

Most winemaking questions offer around 8 marks, so choose the four or five elements from below that are **most relevant** to the wine style / region in questions and talk about them with authority. DO NOT simply go through your acronym list mechanically making a comment for each part. The exam is testing if you know **exactly** which aspects of winemaking are key to this particular wine style - you pass by showing you know which ones are most important, and why.

12 overall categories, 25 items to potentially consider

STYLE

1. Sweet - dry - fortified
2. Single variety or blend
3. Single vintage or multi

HARVEST

4. Ripeness
5. Cleanliness / rot / intentional or not
6. Timing
7. Pre-ferment - Prac Guidelines say NO
8. Protective / Reductive vs Oxidative

FERMENT

9. Yeast
10. Temp
11. Time
12. Vessel - type - size - age - material
13. Carbonic
14. Whole bunch / berry
15. Cap management
16. Post Ferm maceration red / white / orange
17. MLF
18. Lees / battonage
19. Oak - time - type - age - size - origin - toast

MATURATION

20. Maturation time - in general
21. Maturation - bottle
22. Maturation - in oak
23. Maturation - neutral / tank / large / old / inert
24. Finishing - fining / filtration / sweetness
25. Bottling - timing - adjustments - CO2
